

Alcatel-Lucent OmniAccess Instant for OmniAccess Instant Access Points 92, 93,105, 134 and 135

INSTANT VIRTUALIZATION OF OMNIACCESS WLAN SWITCH /CONTROLLER

The Alcatel-Lucent OmniAccess Instant virtualizes Alcatel-Lucent OmniAccess Mobility Controller capabilities on 802.11n access points (APs), creating a feature-rich, enterprise-grade wireless LAN (WLAN) that delivers the affordability and simplicity of an entry-level Wi-Fi® network.

IAP92

IAP93

IAP105

IAP134

Offering impressive scalability, the OmniAccess Instant can be installed at a single site or deployed across multiple geographically-dispersed locations. Up to 16 OmniAccess Instant Access Points (IAPs) can be controlled by a single IAP that automatically becomes a primary virtual controller. In the event of primary virtual controller failure, another OmniAccess IAP automatically takes on the role with no disruption.

The OmniAccess Instant product family consists of five IAPs: the OmniAccess IAP92, OmniAccess IAP93, OmniAccess IAP105, OmniAccess IAP 134 and OmniAccess IAP 135.

IAP134 and IAP135 maximize mobile device performance in extremely high-density Wi-Fi client environments and provide strong threat protection with integrated IEEE 802.1AE MACsec security. IAP105 brings affordability to high-density Wi-Fi areas, while

the single-radio IAP92 and IAP93 optimize mobile device performance in low-density Wi-Fi environments.

Virtual-controller technology

The virtual-controller technology in the OmniAccess Instant delivers enterprisegrade capabilities such as AP auto discovery, 802.1X authenti-

cation, role- and device-based policy enforcement, rogue detection and OmniAccess Adaptive Radio Manage- ment (ARM), which optimizes Wi-Fi client behavior by ensuring the APs remain free from RF interference.

Ease of deployment

OmniAccess Instant is up and running in minutes. From a laptop, simply connect wirelessly to a SSID to perform over-the-air provisioning in three easy steps. To expand, just install more OmniAccess IAPs; configurations are automatically uploaded from the designated virtual controller.

IAP MODEL	SPATIAL STREAMS	RADIOS	ANTENNAS	THROUGHPUT PER RADIO
IAP135	3x3 MIMO	Two (2.4 and 5 GHz)	Internal	450 Mbps
IAP134	3x3 MIMO	Two (2.4 and 5 GHz)	External	450 Mbps
IAP105	2x2 MIMO	Two (2.4 and 5 GHz)	Internal	300 Mbps
IAP93	2x2 MIMO	One (2.4 or 5 GHz)	Internal	300 Mbps
IAP92	2x2 MIMO	One (2.4 or 5 GHz)	External	300 Mbps

Management and visibility

Multiple OmniAccess Instant networks can be securely and centrally managed by the Alcatel-Lucent OmniVistaM 3600 Air Manager, allowing the OmniAccess Instant to operate hundreds of remote locations. With the OmniVista 3600 Air Manager, IT has

real-time visibility into users, mobile devices and OmniAccess WLANs from a single management console.

Investment Protection

As WLAN requirements expand, the OmniAccess Instant can be reimaged as an 802.11n campus AP

and migrated to a centralized OmniAccess Mobility Controller architecture that supports up to 2048 APs. In addition to providing WLAN access, APs in a centralized, controller architecture can provide wireless intrusion protection and powerful spectrum-analysis capabilities.
