# OmniSwitch 6624/6648/7700/7800/8800

## Release 5.4.1.557.R01

The following is a list of issues that have been identified and corrected in AOS software release. This document is intended to be used as a pre-upgrade guide and does not replace the Release Notes which are created for every GA release of software.

Important Notice: For a copy of software releases not posted on the Web, or if you have questions or concerns, please contact Alcatel's Technical Support Department.

Problems Fixed Between Builds 526 and 540
Problems Fixed Between Builds 541 and 553
Problems Fixed Between Builds 554 and 557
Under Verification
Known Issues

PR	82076	Build:	5.4.1.236.R01
Summary:	Power Down/L supply isn't on		t to the NMS station if the redundant power
PR	100171	Build:	5.4.1.236.R01
Summary:		th QDISPATCH	ER warnings and Invalid Address used
Explanation:	IPC Receive lo	ogic in 6600 had	couple of flaws which resulted in bad
		ving the IPC red	e and memory double free errors. Resolved ceive logic and fixing some of the loopholes in
PR	100358	Build:	5.4.1.236.R01
Summary:		n't respect IP mo antine Manager (	bility rule when MAC rule is removed.
Explanation:	VLAN port har getting deleted	dware setting is	not flushed properly when MAC rule is to flush the VLAN port hardware setting of
PR	100422	Build:	5.4.1.236.R01
Summary:	No Trap are se	ent to the NMS v	vhen a stacking link is disconnected
PR	100835	Build:	5.4.1.236.R01
Summary: Explanation:			moves the syslog server configuration ration after swlog clear
PR	100969	Build:	5.4.1.236.R01
Summary:			Ctrl when changing VLAN p ort assignment
Explanation:	hikes to 100%		up in the for loop for 2 -3 seconds. So CPU er defense checks are added for reducing the ge is avoided.
		D. JLI	F 4 4 007 D04
PR	100871	Build:	5.4.1.237.R01

PR	100512	Build:	5.4.1.238.R01
Summary:			ies) outgoing the switch should use
•	Loopback0 a		
Explanation:	All SNMP tra	ffic should use Lo	oopback0 as IP -SA if configured
PR	100838	Build:	5.4.1.239.R01
Summary:	"Unable to re	emove NI %d from	n multicast socket" is recorded upon NI reboot
PR	101421	Build:	5.4.1.239.R01
Summary:	OS6: Slow M the Up-Dowr		et-Ping upon Linkagg Up-Down depending or
PR	101753	Build:	5.4.1.242.R01
Summary:	6800 Switch	: Auth ip respond	ing to Client DNS query before login
PR	101522	Build:	5.4.1.243.R01
Summary:	LSA from 64	th neighbor not be	een programmed into the kernel routing table
PR	101475	Build:	5.4.1.244.R01
Summary:	100% CPU lo plugged and		ort network cable on mobile port is un -
PR	101991	Build:	5.4.1.245.R01
Summary:	Crashes on A	AOS switches afte	er turning on IPMS
PR	101487	Build:	5.4.1.246.R01
Summary:	On OS68, IP	MS is blocked wh	en linkagg port disconnects
PR	101926	Build:	5.4.1.247.R01
Summary:	802.1x fail au	uthentication polic	y not working in 6602 Switch
PR	102090	Build:	5.4.1.247.R01
Summary:	OS7 LinkAgo VLAN	g port is not learni	ng/sending any traffic via one port on one
PR	101115	Build:	5.4.1.248.R01
Summary:			on command refers to rfc -3513

PR	102212	Build:	5.4.1.248.R01
Summary:	MAC learned on	Linkagg are not a	ging out in CMM
PR	102718	Build:	5.4.1.250.R01
Summary:	Renew AVLAN ja	ava applets	
PR	103096	Build:	5.4.1.250.R01
Summary:	L3SrcUnicast L3 the DHCP server		packets are not relayed if the L3 src is in
PR	101577	Build:	5.4.1.251.R01
Summary:	The mac-address after getting de-a		ws up in the Avlan and Default Vlan even
Explanation:		ddress compariso	on for avlan client mac-address in a
PR	103198	Build:	5.4.1.253.R01
Summary:	802.1x will not w	ork on the same p	port that has mac authentication
PR	102979	Build:	5.4.1.256.R01
Summary:	Unable to display	/ switch log file in	WebView
PR	103093	Build:	5.4.1.257.R01
Summary:	After canceling the Need fix.	ne scheduled relo	ad it affects the configuration status;
PR	104222	Build:	5.4.1.257.R01
Summary:	Unable to save N	ID5 ospf configura	ation
PR	101544	Build:	5.4.1.258.R01
Summary:	SLB does not wo again	ork once ip SLB se	erver admin status is disable and enable
PR	104878	Build:	5.4.1.258.R01
Summary:	Second Generati	on Modules are n	ot displayed in the WebView of OS7700
PR	104067	Build:	5.4.1.259.R01
Summary:	Corrupted multic	ast entries	

PR Summary: Explanation:	DVMRP Route p	rocessing logic co	5.4.1.260.R01 witch to cra shed with cs_system.pmd prrected to terminate the route processing ess than minimum length.
PR	102530	Build:	5.4.1.261.R01
Summary:	Last change valu	ie for vlan ip not c	lisplayed correctly in OmniVista.
PR	104849	Build:	5.4.1.261.R01
Summary:	show 802.1x' on	stack of 6600 loc	ks up console
PR	104852	Build:	5.4.1.261.R01
Summary:	802.1x non-supp	mac-authenticati	ion fails but port still passes unicast traffic
PR	105047	Build:	5.4.1.261.R01
Summary:	802.1x ports still	have 802.1x polic	cies even though 802.1x is disabled
PR	105114	Build:	5.4.1.261.R01
Summary:	6600 unit in stac forwarding	k comes back up	after crash vlan port never goes to
PR	103547	Build:	5.4.1.262.R01
Summary:	OS7700: Previou switch	usly configured sta	atic route doesn't work after rebooting the
PR	104966	Build:	5.4.1.262.R01
Summary:	802.1x Request	Identity not trigge	red if there is no EAP -Start
PR	105512	Build:	5.4.1.263.R01
Summary:	STP were not de connectors	tecting and blocki	ing the ports with these Type 1 (IBM)
PR	104059	Build:	5.4.1.264.R01
Summary:	QoS classifyl3 bi routers toggle	idged causes the	switch not to forward traffic after HSRP

PR	<b>98493</b> Build: 5.4.1.266.R01	
Summary:	The Switch uses the outer "anonymous" Username in 802.1)	Accounting
Explanation:	packet in case of EAP-TTLS-PAP Radius Client Software on AOS ignores User -Name Attribute	a raturnad from
	Radius Server in Access Accept pa ckets. As per Radius RFG mandatory, but it is important to use this name for accounting where the clients authenticate based on ttls authentication m wherein the inner user name is not interpreted by the AOS so the Fix User Name if returned from Radius Server is interpre and used up for accounting requests and hence Radius Server accounting based on the actual user name.	C this is not g requests echanism witches. With ted and stored
PR	<b>105737</b> Build: 5.4.1.266.R01	
Summary:	"memPartAlloc: block too big" memory corruption with large configuration file	STP
PR	<b>104054</b> Build: 5.4.1.267.R01	
Summary:	Internal Error when executing "802.1x initialize slot/port" on r ports	non 802.1x
PR	<b>104053</b> Build: 5.4.1.268.R01	
Summary:	Internal Error when creating an IP interface with more than 2	0 characters
PR	<b>105880</b> Build: 5.4.1.269.R01	
Summary:	Impossible to stack 6602-48: csHsmNsmT2EndAppliStart() r	eceive EOAS
PR	99548 Build: 5.4.1.270.R01	
Summary:	Interface uptime is wrongly displayed on A OS switches	
PR	<b>104896</b> Build: 5.4.1.273.R01	
Summary:	802.1x mac-auth users go down and never recover after 5 se tree loop	econd spanning
PR	<b>105359</b> Build: 5.4.1.273.R01	
Summary:	Huge volume of multicast traffic spikes the CPU TO 100 % set to 1 in 6602	with T TL valu
Explanation:	Reduce IPMS processing for multicast data packets with IP t sent to software for statistics purpose.	tl 1which are

Alcatel·Lucent 🅢

PR	105754	Build:	5.4.1.275.R01
Summary:	DHCP Relay for in GiAddr subne		comply with RFC2131 wh en the Offer is not
PR	99748	Build:	5.4.1.276.R01
Summary:	CLI lock up if th pmd file	e telnet sessior	n to the switch is lost when trying to read a
Explanation:	Mismatch betwe	een the MIB file	& trap manager file is fixed
PR	103192	Build:	5.4.1.276.R01
Summary:	System hung w	ith crash file	
PR	105862	Build:	5.4.1.276.R01
Summary:	Client cannot ge	et an IP addres	s if avlan default -traffic is enabled.
PR	106509	Build:	5.4.1.276.R01
Summary:	AMAP informati Get command c		not displayed properly when using a SNMP
PR	107150	Build:	5.4.1.279.R01
Summary:	802.1x performation	ance issue	
PR	106173	Build:	5.4.1.281.R01
Summary:	IP interface cha reload	nges on the sw	itch can not be seen on OmniVist a without
PR	106193	Build:	5.4.1.282.R01
Summary:	NI extractions		
Problems	Fixed Betwe	en Builds	284 and 288
PR Summary:	102999 Enhancement c	Build: ode for Data E:	5.4.1.285.R01 cception
PR	82076	Build:	5.4.1.287.R01
Summary:	Power Down/Up supply isn't on p		to the NMS station if the redundant power

105775 OmniSwitch rur	Build: nning DVMRP re	5.4.1.288.R01 eporting "Recvd invalid mask "
107419	Build	5.4.1.288.R01
		nen all the rules are of Ethernet II and
ethertype alone	varies	
Code changes	done in GMN fo	r handling unknown prototype

PR Summary:			5.4.1.475.R01 ondary CMM for correct configuration of

#### Problems Fixed Between Builds 478 and 488

PR	128104	Build:	5.4.1.480.R01
Summary:	Even there are no in 6.3.1 R01	changes in the c	onfiguration, exit command prompts so -
Explanation:			ommand is executed without any ch is exited normally.

PR	119386	Build:	5.4.1.481.R01
Summary:	7700/6800 sw	vitch processing	the unicast arp reply not destined for it.
Explanation:	Block ARP re interfaces, up		h are not destined for switch configured IP

#### Problems Fixed Between Builds 489 and 495

PR	129515	Build:	5.4.1.489.R01
Summary:		tack , ports 1-18 .1.4 through mib	or 33-50 missing when we poll the OID
Explanation:	Code change	0	e bridgePort numbers created for ports in
PR	130718	Build:	5.4.1.494.R01
Summary:	vlan manager socket queue		ries so that ipc buffers are not locked up in
Explanation:		e retry & delay va	lues to avoid buffers getting stuck in socket

PR	128872	Build:	5.4.1.495.R01
Summary:	cmm b took over and cli task suspended		
Explanation:		essage processed LI lockup issues.	by mip Gateway task, which will be helpful in

### Problems Fixed Between Builds 496 and 500

PR	130155	Build:	5.4.1.498.R01	
Summary:	comments showr default config	n as leak in "d	ebug memory monitor show lo	g" on 7700 in
Explanation:	Fixed the memor	y leak in dshe	ell	

PR	<b>125881</b> Build: 5.4.1.502.R01			
Summary:	7700/6850/9800 being attacked by SSH/TELNET/FTP and crashed nee	d		
-	memory dump analysis			
Explanation:	Rate limiting done on SSH sessions under SSH attack. An SSH attack scenario is defined as when the system gets more than 3 SSH session requests within one single minute. Any new SSH connection will need to attempted after waiting for one f ull minute. T	be		
PR	<b>130671</b> Build: 5.4.1.503.R01			
Summary:	MDNS is replicated by 6600 stacks when souce mac is not yet learned or the NIs	n		
PR	<b>131814</b> Build: 5.4.1.506.R01			
Summary:	Mobile ports shows blocking even though STP is disabled and bpdu ig no is enabled on the mobile por	ore		
Explanation:	Fix timing issue on mobile VPAs during takeover			
PR	<b>132369</b> Build: 5.4.1.506.R01			
Summary:	OS7800 NIs crashed: - Urgent pools depletion. "+++ Buffer : Urgent Perc used : 99 Perc allowed: 75"			
Explanation:	Added swlog message to indicate freeing of DMA buffers when NI goes down			
PR	<b>132573</b> Build: 5.4.1.506.R01			
Summary:	sub-second OSPF route convergence dshell command line needed for C 7700 as gospfSubSecond = 1 in	CS		
Explanation:	Using debug flag achieve sub second OSPF convergence.			
PR	<b>132027</b> Build: 5.4.1.507.R01			
Summary:	7000-516-485-R01 only supports 64 ngbrs per Router,			
Explanation:	Support larger number of ospf nbrs per area (>= 128) upto max of 255 nb per system	ors		
PR	<b>132839</b> Build: 5.4.1.507.R01			
Summary:	In enqueue_to_ip_using_ipc, DHCP Snooping vlan -level dropping DHCl packet	Ρ		

PR Summary: Explanation:	<b>130571</b> High OPSF task Flush the invalid	•	5.4.1.511.R01 n unnormal high OSPF LSA acti vity
PR	132122	Build:	5.4.1.512.R01
Summary: Explanation:			eds to be logged in swlog with timestamp. Swlog for easy reference.
PR	131482	Build:	5.4.1.513.R01
Summary:	6600: if we apply a deny rule with a destination ip "any" no traffic passes through.		
Explanation:	Destination ip any rules are programmed correctly in the Hardware.		
PR Summary: Explanation:	133235 CMM take over a Defence fix adde		5.4.1.513.R01 y flash-synchro h during copy flash synchro.

PR	131336	Build:	5.4.1.514.R01	
Summary: ping and traceroute command not available for read -only users				
Explanation:	New CLI command is added to allow ping/traceroute access for read -only users. Here is Sample CLI commands usage			
	user read-onl	y-group allow ping	g-traceroute	
	user read-only-group deny ping-traceroute			
	show user rea	ad-only-group pine	g-traceroute	
PR	133643	Build:	5.4.1.515.R01	
Summary:	Enhance the	swlog message w	hen port shutdown due to receive BPDU	
Explanation:	Enhanced sw	log message durir	ng port shutdown due to receive bpdu	

PR	133937	Build:	5.4.1.517.R01
		2	•••••••
Summary:			public keys did not work on OS -6600.
Explanation:	Added public	key authenticatio	in to ssh session
PR	134338	Build:	5.4.1.517.R01
Summary:	OS 7700 Dhc	p-snooping datat	base not updated after the DHCP ip renew
Explanation:	Populate DHC	CP binding enable	e if dhcp binding is enabled.
PR	127798	Build:	5.4.1.519.R01
Summary:	FLASH SYNCHRO Aborted. Due to SIMPLEX CMM or 2ndary State		
Explanation:	Code changes to correct error messages shown during Flash synchro		
•	failures in a d	uplex setup	
PR	134184	Build:	5.4.1.519.R01
Summary:	OS7800 crash	ned with slot .pm	ds: "alarm sendPmMsg: sendTo 42 : 0: d: 2
Summary.	failed!!"		
Explanation:	Decrease retr and HSM	ies and increase	delay while sending messages in VLAN Mgr

PR	124760	Build:	5.4.1.522.R01
Summary:	Error Open Mess	age Capability Co	de 65 received from Juniper
Explanation:	Support to ignore with no optional of		abilities for BGP peer and support peers

PR	134406	Build:	5.4.1.523.R01	
Summary:	System rebo	ot with FATAL err	or when copy flash -synchro	
Explanation:	Check for ava	ailable flash space	e of the CMM before starting flas	h synchro.
			- Contractor and the both the C	

Note that the new code with the fix has to present in both the CMMs for the fix to work.

Summary: Explanation:	Maximum num		5.4.1.523.R01 owed_ssh_session" does not work. on when set using debug command is
PR	136393	Build:	5.4.1.524.R01
Summary:	mac address is address	not getting ageo	d out if ip relay not able to receive an DHCP

Summary:	Emweb buffe	r leakage	
			nd introduce additional dshell commands

PR Summary: Explanation:	94907Build:5.4.1.556.R01"Show 802.1x 1/1" command doesn't display anything. Other ports are OK.Fixed Display Issue with showing 802.1x information on the first port (1/1)using command "show 802.1x 1/1" caused due to a wrong interpretation ofindex for the port number 1/1.
Known Iss	ues
PR	106871
Summary:	Switch is not reading owner-attributes from LDAP : so ov3.3 Global QoS does not work
PR	83127
Summary:	+++ [CLISHELL 46] Error on setting tty options at login(851971) DoS attack: bncex on port 23
Explanation:	A DoS attack on port 23 (Telnet) results in "[CLISHELL 32] Error on setting tty options at password(851971)"
Workaround:	The issue is cosmetic and does not affect performance of the switch.
PR	84009
Summary:	igmpInterfaceVersion can set igmp V1 on the interface but CLI and WebView won't
Explanation:	It is not possible to configure an interface as IGMPv1 through the cli or WebView.
Workaround:	Configure an interface as IGMPv1 through SNMP.
PR	84630
Summary:	Show ip udp relay statistics [service] only shows info if there is a vlan assigned to that service
Explanation:	Even webview does not display the entry if there is no vlan associated with the service.
Workaround:	There is no known workaround at this time.
PR	87960
Summary:	Webview doesn't refresh Source Learning table properly causing
Explanation:	submission failed by MAC deletion Sometimes Webview doesn't refre sh Source learning table properly
Workaround:	causing submission failed when trying to delete a MAC Press refresh button before performing mac address deletion.

DD	00040
PR	89316
Summary:	MSTP Edge Port Implementation - We send out rootBridgeID (fffffffff) - Anvl Expect valid Mac Add
Explanation:	Every link-up, we send out a BPDU packet with the Root BridgeID of 0xffff
	to elicit a BPDU reply from the adjacent switch in the current Auto -Edge
	Detection mechanism.
Workaround:	Setting the stpni_useWorstRootBridgeID=0 in NiDbg, then disable/re - enable the STP instance. (These steps are not expected to be performed by the customers, but by our Automation testers who need to setup ANVL test cases.)
PR	90297
Summary:	CST Root convergence in 802.1S takes long or never converges
Explanation:	CST Root convergence in 802.1s may be slow due to the circulation of old 'good' spanning tree vectors in the network when a root switch is powered off
Workaround:	1. Use single MSTP region as much as possible
	2. Tune the performance parameters maxAge and hop count to optimal values for the network.
PR	91729
Summary: Explanation:	Remove unsupported ToS and DSCP from Conditions > Layer 3 pages ToS and DSCP options are not removed from Conditions > Laye r 3 pages
Explanation	as they are also available through cli.
Workaround:	There is no known workaround at this time.
PR	91850
Summary:	WV IPX statistics do not display until CLI cmd 'show ipx traffic' is keyed
Explanation:	IPX statistics are not correct with Webview or SNMP.
Workaround:	A "show ipx traffic" needs to be done on the CLI so that the statistics can be retrieved from the NIs.
PR	98511
Summary:	Switch hangs while trying to learn 250 neighbor mac addresses using NDP in IPv6
Explanation:	When switch learns any ipv6 neighbor mac address, the entry remains in cache forever with state "Stale", it should get deleted after sometime if no communication between switch and its neighbor is taking place.
Workaround:	There is no known workaround at this time.

PR	98522
Summary:	igmp proxy version v3 is not functioning on 8800, 78/7700, 6600
Explanation:	Received IGMP reports are not proxied as V3 reports when IGMP proxy
Workaround:	version is configured as V3 on an OS7000 series switch. There is no known workaround at this time
PR	98526
Summary:	WebView Remote System File Mgmt: Delete File, Copy File, and List Files don't work at the bottom pge
Explanation:	In WebView Remote System File Management; By deleting the file won' t automatically refresh the directory with the current content, it requires clicking the list button in order to see the updated directory contents. Also, there is a timing issue for "List File" which requires clicking the "Refresh" button more than once.
Workaround:	There is no known workaround at this time
PR	98529
Summary:	+++ [CLISHELL 46] Error on setting tty options at login(851971) DoS attack: bncex on port 23
Explanation:	A DoS attack on port 23(Telnet) results in "[CLISHELL 32] Error on setting
Workaround:	tty options at password(851971)" The issue is cosmetic and does not affect performance of the switch.
PR	98534
Summary:	(FFS corruption tracking PR) 'csCvmUtilRecursiveCopyDir: copy error" when certified and flash-synch
Explanation:	Flash File System May become corrupt after Certify, Restore or Flash Synchro process
Workaround:	There is no known workaround at this time
PR	98542
Summary: Explanation:	Problem in sending tagged traffic over mobile ports Currently tagged frames on a mobile port with mobile tag disable will get classified into a vlan if protocol or ip net rules are configured for that vlan on the port.
Workaround:	There is no known workaround at this time

Alcatel·Lucent 🅢

PR	98551
Summary:	Webview Ethernet General Modify Does Not Work on OS8800
Explanation:	In WebView, Physical > Ethernet > Interface Configuration > General
	"Modify" window might display a
	"Set operation finished successfully!" message. However, the changes are
	not made to the table.
Workaround:	Use the "Multiple Modify" window and select the desired slot/port to perform
	the changes.
PR	98559
Summary:	9700 WebView Remote System File Management: Copy from/to Primary
•	doesn't work.
Explanation:	WebView Remote System File Man agement: Though the file list is displayed, an error is logged for the primary cmm.
Workaround:	There is no known workaround at this time.
Workarouna.	
PR	98562
Summary:	Cannot add IPv6 default route using WebView
Explanation:	On an OS8800 switch, an IPv6 default route to the configuration cannot be
Workaround:	added using WebView. Add the IPv6 default route to the configuration using CLI.
Workaround.	Add the IF vo deradic route to the configuration using CLI.
PR	98567
Summary:	10G: "Adding DA entry failed entry = 0x10020," msg displayed on some
Explanation:	slices upon loading debug After loading debugger on 10G NI, some slice showed "adding DA entry
	failed entry" message
Workaround:	There is no known workaround at this time.
PR	98580
Summary:	Pmon is not able to capture IPMS flows when the client is sitting on the monitored port.
Explanation:	This is a hardware limitation on 66xx

PR	98593
Summary:	WebView Vlan 802.1Q modify and apply a already setup tag on a 10 gig port fails.
Explanation:	Webview allows modification on certain 10 gig ports for 802.1q that it
Workaround:	shouldn't cause the modification submission to fail. There is no known workaround at this time.
PR	98594
Summary:	WebView ethernet general modify: after click apply, set successful message not visible in NS 7.0.
Explanation:	WebView > Physical > Ethernet > Interface Configuration > General modify page might not show the "Set Successful" message in Netscape 7.1.
Workaround:	Ignore; whenever there is an error message, the modify page stays open automatically.
PR	98623
Summary:	802.1X GM STP BPDUs are received while port is not authenticated and direction is both.
Explanation:	802.1X GM STP BPDUs will be received while port is not authenticated and direction is both.STP BPDUs are sent to ensure that no loops are formed on the mobile ports.
Workaround:	There is no known workaround at this time.
PR	98626
Summary:	Duplicate mac add's w/ reset/timeout static and dynamic in same vlan after resetting GNI_U12_C2 board
Explanation:	Duplicate mac addresses in the same vlan with reset static and dynamic mac addresses after resetting GNI_U12_C2.This behavior was happening for specific conditions and it doesn't affect the functionality.
Workaround:	There is no known workaround at this time.
PR	98631
Summary:	No trap is sent out by chassis supervision when sfp module is removed from fiber 6600
Explanation:	Logs are available to notify when an sfp is removed or inserted. Currently no traps for this event are defined.

PR	98632
Summary:	Generic udp relay for NTP (123) is not working
Explanation:	According to UDP relay SFS document (section 2.6),
Workaround:	For NTP, the UDP relay will not be able to forward NT P packets, whose destination address is the AOS router port IP address to the NTP server. There is no known workaround at this time
PR	98644
PR Summary:	Get too many warnings when only info set "v6if -6to4-137 (6To4 tunnel)

PR	98655
Summary:	No traps are being generated when an 802.1X feature is being disabled on a port
Explanation:	Mib change will be required to define traps when an 802.1X feature is being disabled on a port. Currently no traps are defined.
Workaround:	There is no known workaround at this time.
PR	82864
Summary:	WebView ethernet general modify: after click apply, set successful message not visible in NS 7.0.
Explanation:	WebView > Physical > Ethernet > Interface Configuration > General modify page might not show the "Set Successful" message in Netscape 7.1.
Workaround:	Ignore; whenever there is an error message, the modify page stays open automatically.
PR	84270
Summary:	WebView's UDP relay association page only allows a maximum of three entries
Explanation: Workaround:	If more than 3 services are configured via WebView, only 3 are displayed. All services are displayed via CLI

PR	84856
Summary:	IP cam space full, count 16374, slot 1 alert message after stream DoS attack
Explanation:	The 6600 learns the source and destination IP address of every forwarded flow, and has a finite space (16K addresses) to store these. These have an aging time of 5 minutes. In certain kind of DoS attacks, the Switch can run out of space to store these add
Workaround:	CLI command "clear arp-cache". This will cause the Switch to delete most, if not all the L3 addresses in hardware. All forwarded traffic will have to be re-learnt.
PR	86576
Summary:	AMAP Adjacencies Remote Host Device field value sometime s shows **ERR("12")** or **ERR("204")**.
Workaround:	None
PR	88942
PR Summary:	88942 Cannot add IPv6 default route using WebView
Summary:	Cannot add IPv6 default route using WebView
Summary: Explanation:	Cannot add IPv6 default route using WebView Cannot add an IPv6 default route to the configuration using Webview.
Summary: Explanation: Workaround:	Cannot add IPv6 default route using WebView Cannot add an IPv6 default route to the configuration using Webview. Add the IPv6 default route to the configuration using the CLI.
Summary: Explanation: Workaround: PR	Cannot add IPv6 default route using WebView Cannot add an IPv6 default route to the configuration using Webview. Add the IPv6 default route to the configuration using the CLI. 90044
Summary: Explanation: Workaround: PR Summary:	Cannot add IPv6 default route using WebView Cannot add an IPv6 default route to the configuration using Webview. Add the IPv6 default route to the configuration using the CLI. 90044 SL entries get flushed by creating GM rule

PR	92933
Summary:	Broadcast-Unicast Traffic forwarded when changing 802.1x par ameter to force-unauthorized
Explanation:	When port is changed from forced -authorized to forced-unauthorized, MAC address that are learned when the port was force -authorized are not flush and thus traffic can still go through as usual. Please note when switching from auto to forced-unauthorized, the client MAC addresses are properly cleaned up. This problem in only when switching from forced -authorized to forced-unauthorized.
Workaround:	Make sure to do a no mac learn to clean the MAC on that port bef ore switching from forced-authorized to forced-unauthorized.
PR	95308
Summary:	Temporary loop on changing bridge priority or port down in RSTP with Link Agg
Explanation:	Temporary traffic loops could happen under the following scenarios: 1. Reloading of a non root bridge.
	This happens when the bridge is going down and is due to the sequential bringing down of NIs during a reload process .It is purely temporary in nature and stops when all the NIs eventually get powered off. 2. NI power down
	When an NI power down command is executed for an NI and if that NI has the Root port port and other NIs have Alternate ports, it is possible to see some traffic looping back from the newly elected Root port. The traffic loop back is temporary and will stop once the NI gets powered off. 3. New Root bridge selection
	Temporary loops could occur during the process of electing a new Root bridge, if this election process is triggered by the assignment a worse priority for the existing root bridge or a root bridge failure. This happens due to the inconsistent spanning tree topology during the convergence and stops entirely once the network converges
Workaround:	For items 1 and 2 above there is no work around presently. For item 3 the following work around co uld be applied:
	To her 5 the following work around to did be applied.
	1. Tune the max age (and or max hops in the case of MSTP) parameter to a lower value that is optimal for the network. This will reduce t

PR	98550
Summary:	[6600] Oversize pkts transmitted by Mirrored port is being received by Mirroring port (in/out/bi)
Explanation:	This is expected behavior as per the mirroring implementation in hardware. All packets will be mirrored (tx or rx) regardless of the specifics of the packet.
Workaround:	There is no known workaround at this time.
PR	98596
Summary:	After CMM takeover, "show qos port" does not display tagged or trusted 10 Gig ports
Workaround:	Traffic flow on the port is fine and qos rules are also applied. To view the 10gig port in the show qos port command, the port can be administratively disabled and enabled.
PR	100389
Summary:	Takeover on OS8800 with fully loaded Nis did not come up properly
Explanation:	Takeover on OS8800 with fully loaded Nis did not come up properly. This is
Workaround:	a hardware issue. Use different chassis and NIs.
PR	110134
Summary:	PC treated as non-supplicant cannot move back to 802.1x unless down/up switch port
Explanation:	Issue of non-supplicant entries not getting deleted while it is getting deleted in the mac-address table is fixed.
PR	130665
Summary:	OS7 - 5.1.6.498.R02 - "Admin down" is not completly shuting down the port on OS7-ENI-FM12
Explanation:	Admin down on OS7-ENI-FM12 port will not bring the remote end link down.
Workaround:	There is no known workaround.
PR	139633
Summary:	OS6850 crashed when command "copy working certified " with "error
Explanation:	reading /flash/working/ entr Retry mechanism introduced which calculating the checksum of image files
	Nerry mechanism muoduced which calculating the checksum of image mes
