

ALCATEL-LUCENT OMNIAACCESS 103 SERIES ACCESS POINTS

COST-EFFECTIVE DUAL-BAND COVERAGE IN LOW-DENSITY ENTERPRISE WI-FI

Alcatel-Lucent OmniAccess 103 series wireless access points (APs) maximize mobile device performance in low-density Wi-Fi environments while minimizing interference from cellular networks.

These compact and cost-effective APs deliver wireless data rates up to 300 Mb/s per radio, employing 802.11n technology with two spatial MIMO streams.

The OmniAccess AP103 and Instant IAP103 models feature a 2.4-GHz and a 5-GHz radio, each with 2x2:2 MIMO and two integrated omnidirectional down-tilt antennas per radio.

To eliminate sticky client behavior while users roam, the OmniAccess 103 series APs feature ClientMatch™ technology, which continuously gathers session performance metrics from mobile devices. If a mobile device moves away from an AP or if RF interference impedes performance, ClientMatch automatically steers the device to a better AP.

FEATURES

- Advanced Cellular Coexistence (ACC)
 - Enables WLANs to perform at peak efficiency by minimizing interference from 3G/4G LTE networks, distributed antenna systems and commercial small cell/femtocell equipment
- Adaptive Radio Management™ technology
 - Manages the 2.4-GHz and 5-GHz radio bands to optimize Wi-Fi client performance and ensures that APs stay clear of RF interference

- Configuration for part-time or dedicated air monitoring for spectrum analysis and wireless intrusion protection, VPN tunnels to extend remote locations to corporate resources, and wireless mesh connections where Ethernet drops are not available.
- Spectrum analysis
 - Capable of part-time or dedicated air monitoring, the spectrum analyzer remotely scans the 2.4-GHz and 5-GHz radio bands to identify sources of RF interference
- Security
 - With an OpenDNS service subscription, Alcatel-Lucent Instant RAPs deliver integrated web filtering, malware and botnet protection to every device connected to the WLAN
 - Integrated Trusted Platform Module (TPM) for secure storage of credentials and keys
 - SecureJack for secure tunneling of wired Ethernet traffic

BENEFITS

- Multifunctional and affordable
- Improved client performance
- Interference free performance
- Best-in-class RF management

OPERATING MODES

OmniAccess 103 series APs offer a choice of operating modes to meet your unique management and deployment requirements.

Controller-managed mode

When managed by Alcatel-Lucent Mobility Controllers, the OmniAccess AP103 offers centralized configuration, data encryption, policy enforcement and network services, as well as distributed and centralized traffic forwarding.

Alcatel-Lucent Instant™ mode

In Alcatel-Lucent Instant mode, a single OmniAccess IAP103 automatically distributes the network configuration to other Instant APs in the WLAN. If WLAN and network requirements change, a built-in migration path allows Alcatel-Lucent Instant APs to become part of a WLAN that is centrally managed by a Mobility Controller.
