

OAW-AP92 and OAW-AP93 Wireless Access Point

Installation Guide

About the Alcatel-Lucent OAW-AP92/OAW-AP93

The Alcatel-Lucent OAW-AP92 and OAW-AP93 are single-radio, dual-band wireless access points that support the IEEE 802.11n standard for high-performance WLAN. These access points use MIMO (Multiple-in, Multiple-out) technology and other high-throughput mode techniques to deliver high-performance, 802.11n 2.4 GHz or 5 GHz functionality while simultaneously supporting existing 802.11a/b/g wireless services. The OAW-AP92 and OAW-AP93 access points work only in conjunction with an Alcatel-Lucent Switch.

The Alcatel-Lucent OAW-AP92/OAW-AP93 access point provides the following:

- Wireless transceiver
- Protocol-independent networking functionality
- IEEE 802.11a/b/g/n operation as a wireless access point
- IEEE 802.11a/b/g/n operation as a wireless air monitor
- Compatibility with IEEE 802.3af PoE
- Central management configuration and upgrades through an Alcatel-Lucent Switch

The Alcatel-Lucent OAW-AP92/OAW-AP93 requires AOS-W 5.0.1 or later.

Package Contents

- OAW-AP92 or OAW-AP93 access point
- Installation Guide

Inform your supplier if there are any incorrect, missing, or damaged parts. If possible, retain the carton, including the original packing materials. Use these materials to repack and return the unit to the supplier if needed.

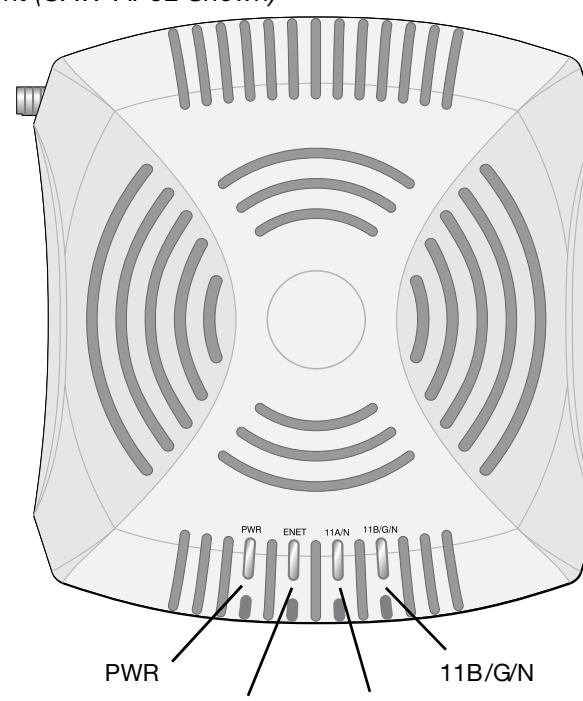

Figure 1 OAW-AP92/OAW-AP93 (OAW-AP92 Shown)

AP92_005

OAW-AP92/OAW-AP93 Hardware Overview

Figure 2 Front (OAW-AP92 Shown)

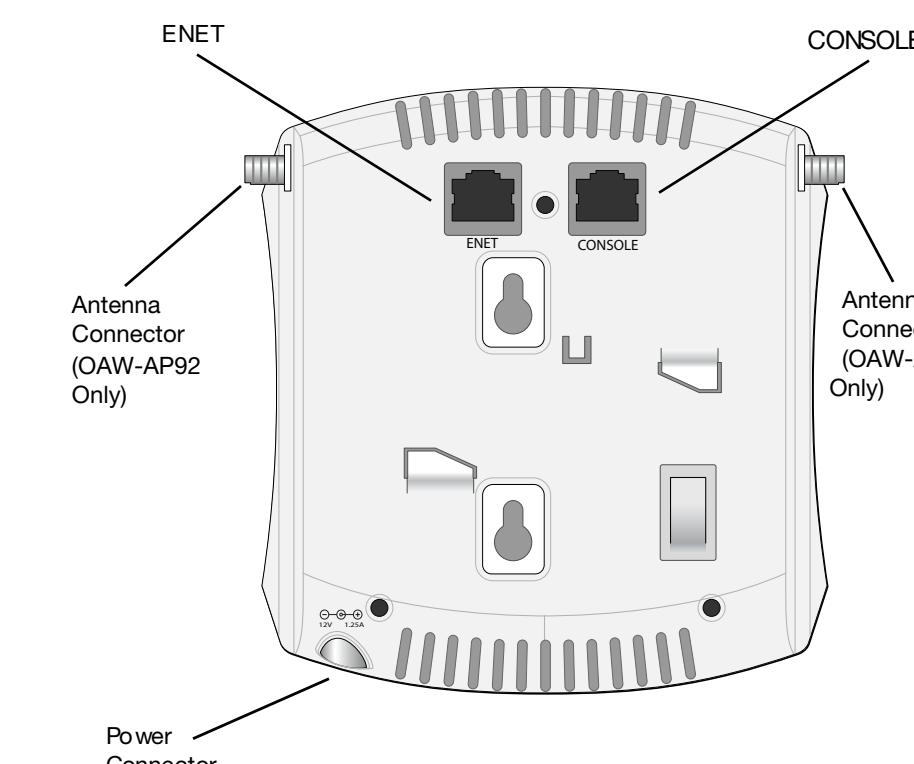

AP92_001

LEDs

- PWR: Indicates whether or not the OAW-AP92/OAW-AP93 is powered-on
- ENET: Indicates the status of the OAW-AP92/OAW-AP93's Ethernet port
- 11A/N: Indicates the status of the 802.11a/n radio
- 11B/G/N: Indicates the status of the 802.11b/g/n radio

For information about the OAW-AP92/OAW-AP93's LED behavior, see [Table 1](#).

Figure 3 Rear (OAW-AP92 Shown)

AP92_002

Console Port

Use the console port to connect to a terminal for direct local management.

Ethernet Port

OAW-AP92/OAW-AP93 is equipped with a single 10/100/1000Base-T (RJ-45) auto-sensing, MDI/MDX wired-network connectivity port. This port supports IEEE 802.3af Power over Ethernet (PoE) compliance, accepting 48VDC as a standard defined Powered Device (PD) from a Power Sourcing Equipment (PSE) such as a PoE midspan injector, or network infrastructure that supports PoE.

DC Power Socket

If PoE is not available, an optional Alcatel-Lucent AP AC-DC adapter kit (sold separately) can be used to power the OAW-AP92/OAW-AP93.

External Antenna Connectors

The OAW-AP92 is designed for use with external antennas. The OAW-AP93 is equipped with internal antennas.

Before You Begin

CAUTION

FCC Statement: Improper termination of access points installed in the United States configured to non-US model switches will be in violation of the FCC grant of equipment authorization. Any such willful or intentional violation may result in a requirement by the FCC for immediate termination of operation and may be subject to forfeiture (47 CFR 1.80).

EU Statement:
Lower power radio LAN product operating in 2.4 GHz and 5 GHz bands. Please refer to the AOS-W User Guide for details on restrictions.

CAUTION
Produit réseau local radio basse puissance operant dans la bande fréquence 2.4 GHz et 5 GHz. Merci de vous renseigner au AOS-W User Guide pour les détails des restrictions.

CAUTION
Low Power FunkLAN Produkt, das im 2.4 GHz und im 5 GHz Band arbeitet. Weitere Informationen bezüglich Einschränkungen finden Sie im AOS-W User Guide.

CAUTION
Apparati Radio LAN a bassa Potenza, operanti a 2.4 GHz e 5 GHz. Fare riferimento alla AOS-W User Guide per avere informazioni dettagliate sulle restrizioni.

Pre-Installation Network Requirements

After WLAN planning is complete and the appropriate products and their placement have been determined, the Alcatel-Lucent switch(s) must be installed and initial setup performed before the Alcatel-Lucent APs are deployed.

For initial setup of the switch, refer to the [AOS-W Quick Start Guide](#) for the software version installed on your switch.

AP Pre-Installation Checklist

Before installing your OAW-AP92/OAW-AP93 access point, be sure that you have the following:

- CAT5 UTP cable of required length
- One of the following power sources:

- IEEE 802.3af-compliant Power over Ethernet (PoE) source
- Alcatel-Lucent AP AC-DC adapter kit (sold separately)
- Alcatel-Lucent Switch provisioned on the network:
- Layer 2/3 network connectivity to your access point

One of the following network services:

- Alcatel-Lucent Discovery Protocol (ADP)
- DNS server with an "A" record
- DHCP Server with vendor-specific options

Summary of the Setup Process

It is important that you verify the items listed under [AP Pre-Installation Checklist](#) before you attempt to set up and install an OAW-AP92/OAW-AP93.

Successful setup of an OAW-AP92/OAW-AP93 access point consists of five tasks, which must be performed in this order:

1. Verify pre-installation connectivity.
2. Identify the specific installation location for each AP.
3. Install each AP.
4. Verify post-installation connectivity.
5. Configure each AP.

Alcatel-Lucent, Inc., in compliance with governmental requirements, has designed the OAW-AP92/OAW-AP93 access points so that only authorized network administrators can change the settings. For more information about AP configuration, refer to the [AOS-W Quick Start Guide](#) and [AOS-W User Guide](#).

CAUTION
Access points are radio transmission devices and as such are subject to governmental regulation. Network administrators responsible for the configuration and operation of access points must comply with local broadcast regulations. Specifically, access points must use channel assignments appropriate to the location in which the access point will be used.

Verifying Pre-Installation Connectivity

Before you install APs in a network environment, make sure that the APs are able to locate and connect to the switch after power on. Specifically, you must verify the following conditions:

- When connected to the network, each AP is assigned a valid IP address
- APs are able to locate the switch

Refer to the [AOS-W Quick Start Guide](#) for instructions on locating and connecting to the switch.

Identifying Specific Installation Locations

CAUTION
RF Radiation Exposure Statement: This equipment complies with FCC RF radiation exposure limits. This equipment should be installed and operated with a minimum distance of 7.87 inches (20 cm) between the radiator and your body for 2.4 GHz and 5 GHz operations. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. When operated in the 5.15 to 5.25 GHz frequency range, this device is restricted to indoor use to reduce the potential for harmful interference with co-channel Mobile Satellite Systems.

You can mount the OAW-AP92/OAW-AP93 access point on a wall or on the ceiling. Use the AP placement map generated by Alcatel-Lucent's RF Plan software application to determine the proper installation location(s). Each location should be as close as possible to the center of the intended coverage area and should be free from obstructions or obvious sources of interference. These RF absorbers/reflectors/interference sources will impact RF propagation and should have been accounted for during the planning phase and adjusted for in RF plan.

Identifying Known RF Absorbers/Reflectors/Interference Sources

Identifying known RF absorbers, reflectors, and interference sources while in the field during the installation phase is critical. Make sure that these sources are taken into consideration when you attach an AP to its fixed location.

RF absorbers include:

- Cement/concrete—Old concrete has high levels of water dissipation, which dries out the concrete, allowing for potential RF propagation. New concrete has high levels of water concentration within the concrete, blocking RF signals.
- Natural Items—Fish tanks, water fountains, ponds, and trees

- Brick

RF reflectors include:

- Metal Objects—Metal pans between floors, rebar, fire doors, air conditioning/heating ducts, mesh windows, blinds, chain link fences (depending on aperture size), refrigerators, racks, shelves, and filing cabinets.
- Do not place an AP between two air conditioning/heating ducts. Make sure that APs are placed below ducts to avoid RF disturbances.

RF interference sources include:

- Microwave ovens and other 2.4 or 5 GHz objects (such as cordless phones)
- Cordless headset such as those used in call centers or lunch rooms

Installing the AP

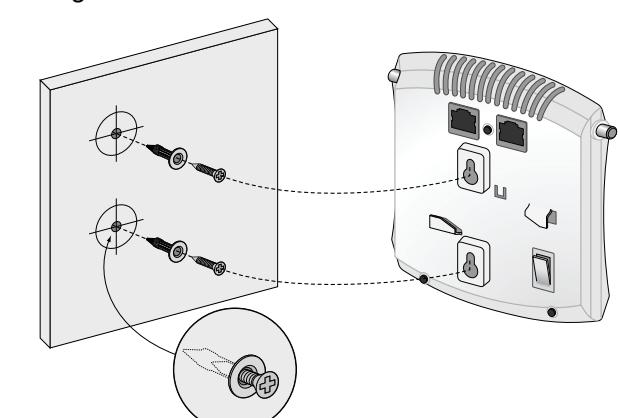

Service to all Alcatel-Lucent Networks products should be performed by trained service personnel only.

Using the Integrated Wall-Mounting Slots

The keyhole-shaped slots on the back of the AP can be used to attach the device upright to an indoor wall or shelf. When you choose the mounting location, allow additional space at the right of the unit for cables.

1. Since the ports are on the back of the device, make sure that you mount the AP is such a way that there is a clear path to the Ethernet port, such as a pre-drilled hole in the mounting surface.
2. At the mounting location, install two screw on the wall or shelf, 1 7/8 inches (4.7 cm) apart. If you are attaching the device to drywall, Alcatel-Lucent recommends using appropriate wall anchors (not included).
3. Align the mounting slots on the rear of the AP over the screws and slide the unit into place (see [Figure 4](#)).

Figure 4 Installing the OAW-AP92/OAW-AP93 Access Point on a Wall

AP92_003

Using the Integrated Ceiling Tile Rail Slots

The snap-in tile rail slots on the rear of the AP can be used to securely attach the device directly to a 15/16" wide, standard ceiling tile rail.

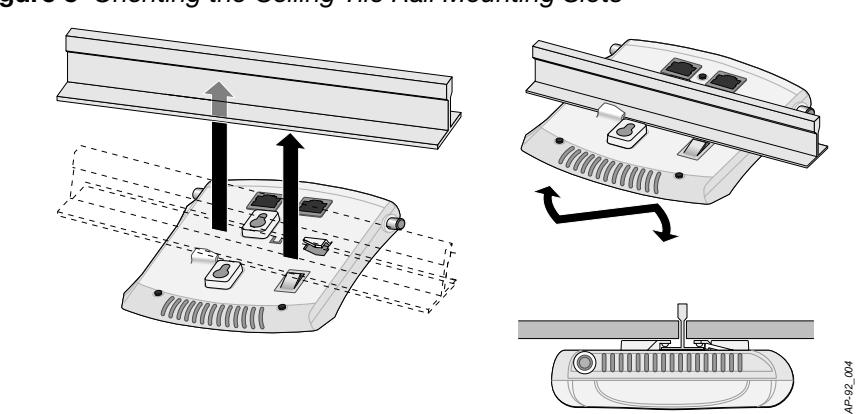

Make sure the AP fits securely on the ceiling tile rail when hanging the device from the ceiling; poor installation could cause it to fall onto people or equipment.

1. Pull the necessary cables through a prepared hole in the ceiling tile near where the AP will be placed.
2. If necessary, connect the console cable to the console port on the back of the AP.

Hold the AP next to the ceiling tile rail with the ceiling tile rail mounting slots at approximately a 30-degree angle to the ceiling tile rail (see [Figure 5](#)). Make sure that any cable slack is above the ceiling tile.

Figure 5 Orienting the Ceiling Tile Rail Mounting Slots

AP92_004

3. Pushing toward the ceiling tile, rotate the AP clockwise until the device clicks into place on the ceiling tile rail.

Connecting Required Cables

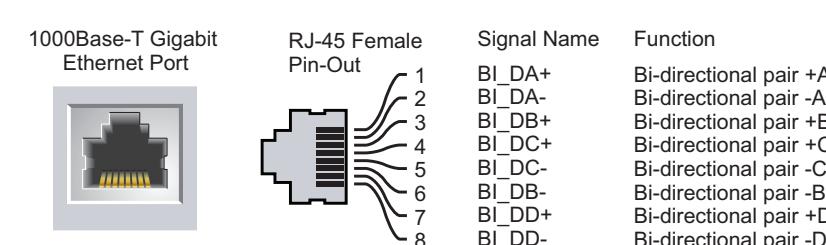

Install cables in accordance with all applicable local and national regulations and practices.

Ethernet Ports

The RJ45 Ethernet port (ENET) supports 10/100/1000Base-T auto-sensing MDI/MDX connections. Use these ports to connect the AP to a twisted pair Ethernet LAN segment or directly to an Alcatel-Lucent Switch. Use a 4- or 8-conductor, Category 5 UTP cable up to 100 m (325 feet) long.

The 10/100/1000 Mbps Ethernet port is on the back of the AP. The port has an RJ-45 female connector with the pinouts shown in .

Figure 6 Gigabit Ethernet Port Pin-Out

Serial Console Port

The serial console port (Console) allows you to connect the AP to a serial terminal or a laptop for direct local management. This port is an RJ-45 female connector with the pinouts described in **Figure 7**. Connect this port directly to a terminal or terminal server using an Ethernet cable.

Use a modular adapter to convert the RJ-45 (female) connector on the AP to a DB-9 (male) connector, and connect the adapter to a laptop using an RS-232 cable. See **Figure 8** for connector details of the adapter.

Figure 7 Serial Port Pin-Out

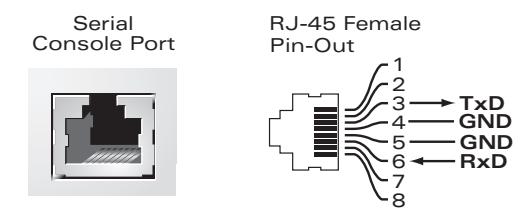

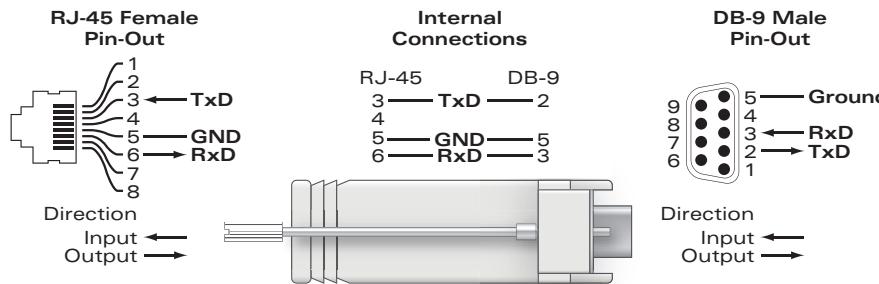

Figure 8 RJ-45 (Female) to DB-9 (Male) Modular Adapter Conversion

Power Connection

The OAW-AP92/OAW-AP93 has a single 12V DC power jack socket to support powering through an AC-to-DC power adapter.

If both POE and DC power are available, the AP uses POE even when there is not enough POE voltage available to power the AP.

Verifying Post-Installation Connectivity

The integrated LEDs on the AP can be used to verify that the AP is receiving power and initializing successfully (see **Table 1**). Refer to the *AOS-W Quick Start Guide* for further details on verifying post-installation network connectivity

Table 1 OAW-AP92/OAW-AP93 Series LED Meanings

LED	Color/State	Meaning
PWR	Off	No power to AP
	Green flashing	System initializing
	Red steady	System failed to initialize, contact TAC
	Green steady	Power on, device ready
ENET (10/100/1000 Mbps)	Off	No link
	Green on	1000 Mbps link
	Amber on	10/100 Mbps link

Table 1 OAW-AP92/OAW-AP93 Series LED Meanings

LED	Color/State	Meaning
11A/N	Off	5 GHz radio is disabled
	Amber	5 GHz radio enabled in WLAN mode
	Green	5 GHz radio enabled in 11n mode
	Green flashing	5 GHz Air Monitor or RF Protect mode
11B/G/N	Off	2.4 GHz radio disabled
	Amber	2.4 GHz radio enabled in WLAN mode
	Green	2.4 GHz radio enabled in 11n mode
	Green flashing	2.4 GHz Air Monitor or RF Protect mode

Configuring the OAW-AP92/OAW-AP93

AP Provisioning/Reprovisioning

Provisioning parameters are unique to each AP. These local AP parameters are initially configured on the switch which are then pushed out to the AP and stored on the AP itself. Alcatel-Lucent recommends that provisioning settings be configured via the AOS-W Web UI only. Refer to the *AOS-W User Guide* for complete details.

AP Configuration

Configuration parameters are network or switch specific and are configured and stored on the switch. Network configuration settings are pushed out to the AP(s) but remain stored on the switch.

Configuration settings can be configured via the AOS-W Web UI, AOS-W CLI, or Alcatel-Lucent MMS. Refer to their respective guides for further details: the *AOS-W User Guide* or *Alcatel-Lucent Mobility Management System User Guide*.

Product Specifications

Mechanical

- Dimensions (HxWxD):
 - 4.7 inches x 5.1 inches x 1.4 inches (12.0 cm x 13.0 cm x 3.5 cm)
- Weight: 375g/0.82 lbs.
- Operating Temperature: 0°C to 50°C (32°F to 122°F)
- Storage Temperature: -10°C to 70°C (14°F to 158°F)
- Relative Humidity: 5% to 95% non-condensing
- Altitude: 3,000 m @ 50°C (122°F)
- Mounting: Wall or ceiling
- Visual Status Indicators (LEDs): See **Table 1**

Electrical

- Ethernet:
 - 1 x 10/100/1000Base-T auto-sensing Ethernet RJ-45 Interfaces
 - MDI/MDX
 - IEEE 802.3 (10Base-T), IEEE 802.3u (100Base-T), IEEE 802.3ab (1000Base-T)
 - Power over Ethernet (IEEE 802.3af compliant), 48V DC/350mA (see **Figure 6** for pin configuration)
- Power:
 - 12 VDC power interface, supports powering through an AC-to-DC power adapter

If a power adapter other than the one provided by Alcatel-Lucent Networks is used in the US or Canada, it should be cULus (NRTL) Listed, with an output rated 12 VDC, minimum 1.25A, marked "LPS" or "Class 2," and suitable for plugging into a standard power receptacle in the US and Canada.

Wireless LAN

- Network Standards: IEEE 802.11b, IEEE 802.11g, IEEE 802.11a, and IEEE 802.11n (draft)
- Antenna Type (OAW-AP92):
 - 2x dual-band antenna connectors (RP-SMA)
- Antenna Type (OAW-AP93):
 - 2x 802.11a/b/g/n, internal
- Antenna Gain (Integrated Antennas):
 - 2.4 – 2.5 GHz/2.5 dBi (max)
 - 5.180 – 5.825 GHz/5.8 dBi (max)
- Radio Technology
 - Orthogonal Frequency Division Multiplexing (OFDM)
 - Direct Sequence Spread Spectrum (DSSS)
- Radio Modulation Type:
 - 802.11b - CCK, BPSK, QPSK
 - 802.11g - CCK, BPSK, QPSK, 16-QAM, 64-QAM

- 802.11a - BPSK, QPSK, 16-QAM, 64-QAM
- 802.11n draft 2.0
- Media Access Control: CSMA/CA with ACK
- Supported Frequency Bands 2.4GHz:
 - 2.400 ~ 2.4835GHz (Global), channels country specific
- Supported Frequency Bands 5GHz:
 - 5.150 ~ 5.250GHz (low band), country-specific
 - 5.250 ~ 5.350GHz (mid band), country-specific
 - 5.470 ~ 5.725GHz (Europe), country-specific
 - 5.725 ~ 5.825GHz (high band), country-specific
- Data Rates:
 - 802.11b - 1, 2, 5.5, 11 Mbps per channel
 - 802.11g - 6, 9, 12, 18, 24, 36, 48 and 54 Mbps per channel
 - 802.11a - 6, 9, 12, 18, 24, 36, 48 and 54 Mbps per channel
 - 802.11n - Data rate MCS0 – MCS15 (from 6.5 Mbps to 300 Mbps)

Proper Disposal of Alcatel-Lucent Equipment

For the most current information about Global Environmental Compliance and Alcatel-Lucent products, see our website at <https://service.esd.alcatel-lucent.com>.

Waste of Electrical and Electronic Equipment

Alcatel-Lucent products at end of life are subject to separate collection and treatment in the EU Member States, Norway, and Switzerland and therefore are marked with the symbol shown at the left (crossed-out wheelie bin). The treatment applied at end of life of these products in these countries shall comply with the applicable national laws of countries implementing Directive 2002/96/EC on Waste of Electrical and Electronic Equipment (WEEE).

European Union RoHS

Alcatel-Lucent products also comply with the EU Restriction of Hazardous Substances Directive 2002/95/EC (RoHS). EU RoHS restricts the use of specific hazardous materials in the manufacture of electrical and electronic equipment. Specifically, restricted materials under the RoHS Directive are Lead (including Solder used in printed circuit assemblies), Cadmium, Mercury, Hexavalent Chromium, and Bromine. Some Alcatel-Lucent products are subject to the exemptions listed in RoHS Directive Annex 7 (Lead in solder used in printed circuit assemblies). Products and packaging will be marked with the "RoHS" label shown at the left indicating conformance to this Directive.

China RoHS

Alcatel-Lucent products also comply with China environmental declaration requirements and are labeled with the "EFUP 10" label shown at the left.

有毒有害物质声明

Hazardous Materials Declaration

部件名称 (Parts)	有害有毒物质或元素 (Hazardous Substance)					
铅 (Pb)	×	○	○	○	○	○
电路板 (PCB Boards)						
机械组件 (Mechanical Sub-Assemblies)	×	○	○	○	○	○

○: 表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T11363-2006 标准规定的限量要求以下。Indicates that the concentration of the hazardous substance in all homogeneous materials in the parts is below the relevant threshold of the SJ/T11363-2006 standard.

×: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超过 SJ/T11363-2006 标准规定的限量要求。Indicates that the concentration of the hazardous substance of at least one of all homogeneous materials in the parts is above the relevant threshold of the SJ/T11363-2006 standard.

对销售之日的所售产品,本表显示,供应链的电子信息产品可能包含这些物质。
This table shows where these substances may be found in the supply chain of electronic information products, as of the date of sale of the enclosed product.

此标志为针对所涉及产品的环保使用期标志,某些零部件会有一个不同的环保使用期(例如,电池并不标记)贴在其产品上。

此环保使用期只适用于产品手册中所规定的条件下工作。

The Environment-Friendly Use Period (EFUP) for all enclosed products and their parts are per the symbol shown here. The Environment-Friendly Use Period is valid only when the product is operated under the conditions defined in the product manual.

Safety and Regulatory Compliance

Alcatel-Lucent Networks provides a multi-language document that contains country-specific restrictions and additional safety and regulatory information for all Alcatel-Lucent access points. This document can be viewed or downloaded from the following location: <https://service.esd.alcatel-lucent.com>

RF Radiation Exposure Statement: This equipment complies with FCC RF radiation exposure limits. This equipment should be installed and operated with a minimum distance of 7.87 inches (20 cm) between the radiator and your body for 2.4 GHz and 5 GHz operations. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. When operated in the 5.15 to 5.25 GHz frequency range, this device is restricted to indoor use to reduce the potential for harmful interference with co-channel Mobile Satellite Systems.

Alcatel-Lucent access points must be installed by a professional installer. The professional installer is responsible for ensuring that grounding is available and it meets applicable local and national electrical codes.
