

ERB9250

802.11b/g/n Range Extender

- 2.4 GHz
- 300Mbps
- 11N Repeater/
client bridge

PRODUCT DESCRIPTION

ERB9250 is a 2.4GHz 802.11b/g/n 300Mbps Repeater & Client Bridge (Range Booster / Extender). Range Extender solves the signal attenuation (limited coverage) problem by literally repeating / extending AP radio signal to dead-spots. While repeater clones AP and serves as a subsidiary entity to its clients, client bridge offers an extension of wired network to the AP.
