

# Key Features

- + Wireless AC1750 Speed
- + Gigabit Wired Speeds and EnShare™ USB Media Sharing
- + Quantum Beam™ technology for faster 5 GHz wireless connectivity
- + More Guest Access Options
- + Prioritizes Applications and Maintains Quality of Experience
- + Industry-Standard Security

# Dual Band Wireless **AC**1750 Router

with Gigabit Ports, USB, Quantum Beam™, and EnShare™

Expand your entertainment options with this incredibly fast media streaming and sharing platform

## **Extreme Dual Band Speed for the Audio Visual Enthusiast**

Designed for the serious audio/videophile, the EnGenius ESR1750 is a Dual Band (450 + 1300 Mbps) Wireless AC1750 Router with a Gigabit WAN port for faster upload and download speeds and a built-in 4-Port Gigabit switch for connecting home entertainment devices like HDTVs, Blu-ray players, set top boxes or game consoles so they can access a family's Internet connection. This high-powered Xtra Range™ podshaped router also includes a USB port for attaching a storage device and sharing media content in the home or away from home to mobile devices like smartphones or tablet and laptop PCs with EnShare™.

## Quantum Beam™

The ESR1750 includes Quantum Beam<sup>™</sup>, a beam forming technology that delivers extremely fast 5 GHz wireless connectivity to 5 GHz AC adapters, computers and other devices. The ESR1750 also supports industry standard wireless encryption,

such as WPA/WPA2 (Wireless Protected Access) to prevent unauthorized access to the home network; users can also enable up to eight separate and discrete SSIDs, Service Set Identifiers (four SSIDs per frequency band) or ways to access the network. This gives families the ability to offer friends or visitors Internet access or access to specific devices, like networked printers, while protecting other networked computers or hard drives in the home that may contain private information.

This smart router also employs Advanced QoS (Quality of Service) to prioritize bandwidth-intensive applications like video and gaming or bandwidth sensitive applications like VoIP (Voice over IP) telephone calls for optimal connectivity whether over wired or wireless connections.

#### USB Media Anywhere with EnShare™

Attach a storage device to the router's USB port and with EnShare you

can start sharing media content like photos, music, or videos throughout the home or even access and download that content when you're away from home to your mobile devices like smartphones or tablet and laptop PCs. EnShare also enables you to upload files to your attached storage device anywhere you can get an Internet connection.

# **Technical Specifications**

# **Device Interface**

1x Gigabit WAN Port

4x Gigabit LAN Ports

1x USB2 0 Port

1x Push Button for WPS

1x Reset

# **Package Contents**

1x ESR1750

1x Power Adapter

1x Ouick Start Guide

1x EnShare™ Guide

1x RJ-45 Ethernet Cable

## **Power Specification**

External Power Adapter DC IN, 12V 1.5A

#### Certification

FCC/CE/IC

# Physical/Environmental Condition

Operation Temperature: Temperature  $0^{\circ} \approx 40^{\circ}$  Humidity 90% or less (Non-condensing) Storage Temperature: Temperature  $-20^{\circ} \approx 60^{\circ}$  Humidity 95% or less (Non-condensing)

## **Software Features**

## **Operation Mode:**

AP Router

# Wireless Features:

Quantum Beam™ 5 GHz beam forming technology

Auto Channel Selection

**Output Power Control** 

WMM (WiFi Multimedia)

MSSID (Multiple SSID)

#### **Security:**

WEP/WPA-PSK/WPA2-PSK

Maximum data rates are based on draft IEEE 802.11ac and IEEE 802.11 standards. Actual throughput and range may vary depending on many factors including environmental conditions, distance between devices, radio interference in the operating environment, and mix of devices in the network. EnGenius Technologies, Inc. EnShare™ supports both FAT32 and NTFS USB formats. Transfer speeds of data from your router-attached USB storage device to a remote/mobile device may vary based on Internet uplink and downlink speeds, bandwidth traffic at either send or receive locations, the data retrieval performance of the attached storage device or other factors. EnGenius does not guarantee compatibility with all USB drives. EnGenius does not warrant its products or EnShare from loss of data or loss of productivity time.
