## Introduction

This Reference Guide provides information on the Ruckus Unleashed Simple Network Management Protocol (SNMP) Management Information Base objects (MIBs) that Unleashed supports.

### NOTE

For information on how to enable SNMP trap delivery and configure other SNMP settings on the Unleashed web interface, refer to the Unleashed Online Help, available from within the web interface.

## Changes in This Version

This section lists the changes in SNMP MIBs and OIDs between this version and the previous release.

Unleashed release 200.10 contains the following SNMP MIB changes from the previous release (200.9):

MIB Tree	OID	Node Name	Change
None	None	None	None

## Related Documentation

In addition to this *Reference Guide*, each Unleashed documentation set includes the following:

- *Unleashed Online Help*: Provides instructions for performing tasks using the Unleashed web interface. The online help is accessible from the web interface and is searchable.
- *Unleashed Release Notes*: Provide information about the current software release, including new features, enhancements, and known issues.
- *Unleashed Troubleshooting Guide*: Provides installation guidelines and troubleshooting information for Unleashed deployments.
- *Unleashed Upgrade Guide*: Provides upgrade instructions and information on supported upgrade paths and limitations for upgrading to this release.

## Documentation Feedback

RUCKUS is interested in improving its documentation and welcomes your comments and suggestions. You can email your comments to RUCKUS at: [#Ruckus-Docs@commscope.com](mailto:#Ruckus-Docs@commscope.com)
