## Export Restrictions

These products and associated technical data (in print or electronic form) may be subject to export control laws of the United States of America. It is your responsibility to determine the applicable regulations and to comply with them. The following notice is applicable for all products or technology subject to export control:

*These items are controlled by the U.S. Government and authorized for export only to the country of ultimate destination for use by the ultimate consignee or end-user(s) herein identified. They may not be resold, transferred, or otherwise disposed of, to any other country or to any person other than the authorized ultimate consignee or end-user(s), either in their original form or after being incorporated into other items, without first obtaining approval from the U.S. government or as otherwise authorized by U.S. law and regulations.*

## Disclaimer

THIS CONTENT AND ASSOCIATED PRODUCTS OR SERVICES ("MATERIALS"), ARE PROVIDED "AS IS" AND WITHOUT WARRANTIES OF ANY KIND, WHETHER EXPRESS OR IMPLIED. TO THE FULLEST EXTENT PERMISSIBLE PURSUANT TO APPLICABLE LAW, COMMSCOPE DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, FREEDOM FROM COMPUTER VIRUS, AND WARRANTIES ARISING FROM COURSE OF DEALING OR COURSE OF PERFORMANCE. CommScope does not represent or warrant that the functions described or contained in the Materials will be uninterrupted or error-free, that defects will be corrected, or are free of viruses or other harmful components. CommScope does not make any warranties or representations regarding the use of the Materials in terms of their completeness, correctness, accuracy, adequacy, usefulness, timeliness, reliability or otherwise. As a condition of your use of the Materials, you warrant to CommScope that you will not make use thereof for any purpose that is unlawful or prohibited by their associated terms of use.

## Limitation of Liability

IN NO EVENT SHALL COMMSCOPE, COMMSCOPE AFFILIATES, OR THEIR OFFICERS, DIRECTORS, EMPLOYEES, AGENTS, SUPPLIERS, LICENSORS AND THIRD PARTY PARTNERS, BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, INCIDENTAL, EXEMPLARY OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES WHATSOEVER, EVEN IF COMMSCOPE HAS BEEN PREVIOUSLY ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN AN ACTION UNDER CONTRACT, TORT, OR ANY OTHER THEORY ARISING FROM YOUR ACCESS TO, OR USE OF, THE MATERIALS. Because some jurisdictions do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of liability for consequential or incidental damages, some of the above limitations may not apply to you.

## Trademarks

ARRIS, the ARRIS logo, COMMSCOPE, RUCKUS, RUCKUS WIRELESS, the Ruckus logo, the Big Dog design, BEAMFLEX, CHANNELFLY, FASTIRON, ICX, SMARTCELL and UNLEASHED are trademarks of CommScope, Inc. and/or its affiliates. Wi-Fi Alliance, Wi-Fi, the Wi-Fi logo, Wi-Fi Certified, the Wi-Fi CERTIFIED logo, Wi-Fi Protected Access, the Wi-Fi Protected Setup logo, Wi-Fi Protected Setup, Wi-Fi Multimedia and WPA2 and WMM are trademarks or registered trademarks of Wi-Fi Alliance. All other trademarks are the property of their respective owners.

# RUCKUS Analytics Introduction

---

RUCKUS Analytics is a data analytics software-as-a-service product designed to help users get data driven insights into their network deployment, and assist them in pro-actively managing their network.

- Supported Controller Versions:
  - SmartZone versions 5.1.2 and later
- Supported Browsers
  - Chrome
  - Firefox
  - Safari

# New in This Release

---

- [New Features.....](#) 7
- [Changed Behavior.....](#) 7

## New Features

RUCKUS Analytics has the following features.

- Introduces Role Based Access Control (RBAC). Roles include super admin, network admin and reports only.
- Administrator can manage APs and switches organized into resource groups by using RBAC.
- The Client Health Report page calculates and displays a client health score to quickly assess the health of client connections. It presents a summary of Client RF Health in a complex RF environment that is easy to consume and comprehend. Clients with good, average, and poor RF scores are displayed in colored boxes.
- Compare Filters helps compare sets of data within the networks against one another to provide a better understanding of network health based on various dimensions such as network deployments, brand, region and so on. It is a powerful tool that compares data sets across different parts of the network. It allows administrators to define filters to select portions of the network and compare 20+ attributes across them.
- Users can better analyze latency issues within the network as insights are optimized to report latency issues between nodes within a cluster, against acceptable thresholds.
- Saved Filters have been integrated in to the custom AP, Switch, SSID, Radio Filters and integrated into one pane. It is now a global filter and shows all the report filters, however it is not related to the context of the page and applies to the entire application now; both AP and Switch filters are displayed. The filter name is also displayed. It also comes with options to update, delete and clear selections. Search inside saved filters is newly added.

It allow administrators to focus their investigation to a specific portion of the network. These filters can now be saved and reused eliminating unnecessary steps.

- Includes the ability to provide email notifications for incidents from severity levels P1 to P4, and for license expiration.

## Changed Behavior

This section describes changes in product behavior, in this release.

- Application data is now available for 5 GHz Radio. You can now filter application by 5 GHz radio type in the **Applications Report**, and from **Data Explorer > Application Cube**.
- Status messages provided in the **Onboarding Systems** page are more detailed (tool-tip is displayed with detailed information).
- KPI information provided in the Health page is detailed and comprehensive. KPIs that met the SLA for the entire time range and selected time range can now be compared.
- Improved speed and ability to select license for APs.
- License page performance is improved.

# Known Issues

---

This section describes the known caveats and limitations of the product.

- SmartZone 5.1.2 is the minimum supported controller version
- Supported browsers include Chrome, Firefox and Safari
- Search bar data is delayed by 15 minutes
- Reports data is delayed by 45 minutes
- Filter Selection: Changing the filter selection in a report applies only to that report. When user moves from the Analytics pages to a report, the network filter is carried over (i.e. selected network filter applied to the report)
- The PDF export of a report can timeout sometimes (for large reports)
- Sections in the Health Page can time out if a time period of > 1month is selected.
- Data granularity is expected to be set at the highest granularity: 90 seconds for vSZ-E, and 180s for vSZ-H
- It can take up to one week for the system to learn your network and generate insights
- The SmartZone controller name is retrieved from the controller at the time of onboarding. However, if the name is changed after onboarding the controller, RUCKUS Analytics will not display the updated controller name.
- A grace period of seven days is available after the licenses expire. After license expires, you can only view your historical data for six months.

# Resolved Issues

---

This section describes resolved issues.

- Due to network latency, no data is populated even though the SmartZone controller is connected and cloud services is enabled on the controller. (ER-8285, ER-8257)
- SmartZone controller onboarding stops when RUCKUS Analytics instructs the controller to delete existing data connectors and profiles. RUCKUS Analytics does not receive a response from the controller and the session times out (ER-8331)
- SmartZone controller is not displayed even after onboarding to RUCKUS Analytics (ER-8235)
