No part of this content may be reproduced in any form or by any means or used to make any derivative work (such as translation, transformation, or adaptation) without written permission from CommScope, Inc. and/or its affiliates ("CommScope"). CommScope reserves the right to revise or change this content from time to time without obligation on the part of CommScope to provide notification of such revision or change.

Export Restrictions

These products and associated technical data (in print or electronic form) may be subject to export control laws of the United States of America. It is your responsibility to determine the applicable regulations and to comply with them. The following notice is applicable for all products or technology subject to export control:

These items are controlled by the U.S. Government and authorized for export only to the country of ultimate destination for use by the ultimate consignee or end-user(s) herein identified. They may not be resold, transferred, or otherwise disposed of, to any other country or to any person other than the authorized ultimate consignee or end-user(s), either in their original form or after being incorporated into other items, without first obtaining approval from the U.S. government or as otherwise authorized by U.S. law and regulations.

Disclaimer

THIS CONTENT AND ASSOCIATED PRODUCTS OR SERVICES ("MATERIALS"), ARE PROVIDED "AS IS" AND WITHOUT WARRANTIES OF ANY KIND, WHETHER EXPRESS OR IMPLIED. TO THE FULLEST EXTENT PERMISSIBLE PURSUANT TO APPLICABLE LAW, COMMSCOPE DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, FREEDOM FROM COMPUTER VIRUS, AND WARRANTIES ARISING FROM COURSE OF DEALING OR COURSE OF PERFORMANCE. CommScope does not represent or warrant that the functions described or contained in the Materials will be uninterrupted or error-free, that defects will be corrected, or are free of viruses or other harmful components. CommScope does not make any warranties or representations regarding the use of the Materials in terms of their completeness, correctness, accuracy, adequacy, usefulness, timeliness, reliability or otherwise. As a condition of your use of the Materials, you warrant to CommScope that you will not make use thereof for any purpose that is unlawful or prohibited by their associated terms of use.

Limitation of Liability

IN NO EVENT SHALL COMMSCOPE, COMMSCOPE AFFILIATES, OR THEIR OFFICERS, DIRECTORS, EMPLOYEES, AGENTS, SUPPLIERS, LICENSORS AND THIRD PARTY PARTNERS, BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, INCIDENTAL, EXEMPLARY OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES WHATSOEVER, EVEN IF COMMSCOPE HAS BEEN PREVIOUSLY ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN AN ACTION UNDER CONTRACT, TORT, OR ANY OTHER THEORY ARISING FROM YOUR ACCESS TO, OR USE OF, THE MATERIALS. Because some jurisdictions do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of liability for consequential or incidental damages, some of the above limitations may not apply to you.

Trademarks

ARRIS, the ARRIS logo, COMMSCOPE, RUCKUS, RUCKUS WIRELESS, the Ruckus logo, the Big Dog design, BEAMFLEX, CHANNELFLY, FASTIRON, ICX, SMARTCELL and UNLEASHED are trademarks of CommScope, Inc. and/or its affiliates. Wi-Fi Alliance, Wi-Fi, the Wi-Fi logo, Wi-Fi Certified, the Wi-Fi CERTIFIED logo, Wi-Fi Protected Access, the Wi-Fi Protected Setup logo, Wi-Fi Protected Setup, Wi-Fi Multimedia and WPA2 and WMM are trademarks or registered trademarks of Wi-Fi Alliance. All other trademarks are the property of their respective owners.

RUCKUS Analytics Introduction

RUCKUS Analytics is a cloud service for network intelligence and service assurance.

Powered by machine learning and artificial intelligence, it gives IT comprehensive visibility into network operations. It accelerates troubleshooting and helps IT teams meet their network SLAs. RUCKUS Analytics automatically identifies service assurance incidents, classifies them by severity, traces root causes and makes specific recommendations for remediation. It automatically monitors network health relative to customer defined SLA. Advanced client troubleshooting and incident analytics give IT teams the power to address service issues for individual users and devices. The service also delivers robust reporting and informative dashboards. Create custom dashboards and data visualizations with the Data Explorer tool—and flexibly explore your network data warehouse with drag-and-drop ease.

RUCKUS Analytics aggregates raw data and automatically transforms it into deep insight into network operations. This ML- and AI-powered analytics service frees IT teams a wide variety of manual tasks associated with service assurance. Comprehensive network intelligence helps deliver network service level agreements in support of users, devices and applications.

- Supported Controller Versions:
 - SmartZone versions 5.1.2 and later
- Supported Browsers
 - Chrome
 - Firefox
 - Safari

New in This Release

- [New Features.....](#) 7
- [Changed Behavior.....](#) 8

New Features

RUCKUS Analytics has the following features.

- Service Validation is a new feature that offers a comprehensive, end-to-end testing mechanism to validate LAN, WAN and connectivity to application servers. IT teams can use Service Validation to generate tests to perform step-by-step tests of each connection stage 802.11, EAP, RADIUS, DHCP, Ping, Traceroute and Speed Tests (Upload/Download) . This approach helps in a methodical network analysis and reveals failures and bottlenecks in network connection stages.

IT administrators can use APs in service to create virtual end user clients and perform network tests without impacting existing client connections. This flexibility allows IT team to perform periodic network maintenance without the need to advertise service downtime during the service maintenance window.

In this release IT administrators can choose the following authentication types - WPA2-Personal, WPA2-Enterprise, 802.1X with WISPr, Web Authentication, Guest Access and Open Auth.

This feature is supported on SmartZone version 5.2.1 and later, and supported only in 802.11ac-wave2 and 802.11ax APs. Following are the list of AP models that are supported.

- H550
- R730
- R750
- R650
- T750
- T750SE
- R850
- R550
- R320
- R510
- M510
- H510
- H320
- T310/T310D/T310S/T310C
- T305I/E
- E510
- R710
- R720
- T710
- T610
- R610

- The Reboot insight provides more information regarding AP reboot events, number of APs that rebooted, and number of clients connected to the AP during reboot.

New in This Release

Changed Behavior

- The SmartZone CPU overload insight provides more information about the CPU usage and I/O usage across applications and application groups.

Changed Behavior

This section describes changes in product behavior, in this release.

None.

Known Issues

This section describes the known caveats and limitations of the product.

- SmartZone 5.1.2 is the minimum supported controller version
- Service Validation feature requires SZ 5.2.1 controller version
- Custom DNS server is not used in ping, traceroute and speedtest phase of service validation test
- Service Validation does not support the following authentication types in this release - 802.1X with EAP-TLS/EAP-SIM, WPA3, DPSK, Hotspot 2.0, MAC authentication, WeChat, WISPr with external service provider
- RUCKUS recommends that you do not test Service Validation with disabled user accounts on the AAA server.
- Service Validation is not supported with AAA servers configured with retry or action, from client options.
- Supported browsers include Chrome, Firefox and Safari
- Search bar data is delayed by 15 minutes
- Reports data is delayed by 45 minutes
- Filter Selection: Changing the filter selection in a report applies only to that report. When user moves from the Analytics pages to a report, the network filter is carried over (i.e. selected network filter applied to the report)
- The PDF export of a report can timeout sometimes (for large reports)
- Sections in the Health Page can time out if a time period of > 1month is selected.
- Data granularity is expected to be set at the highest granularity: 90 seconds for vSZ-E, and 180s for vSZ-H
- It can take up to one week for the system to learn your network and generate insights
- The SmartZone controller name is retrieved from the controller at the time of onboarding. However, if the name is changed after onboarding the controller, RUCKUS Analytics will not display the updated controller name.
- A grace period of seven days is available after the licenses expire. After license expires, you can only view your historical data for six months.

Resolved Issues

This section describes resolved issues.

- Issue with controller onboarding to RUCKUS Analytics and synchronizing licensing data was resolved. (ER-8659, ER-8688).
- Issue with certain VAR user accounts for invitation as third-party users was resolved (ER-8856).
- Errors when downloading AP Details were resolved. (ER-8784).
- Issues with vSZ onboarding due to account information mismatch were resolved (ER-8663).
