Unleashed is a controller-less WLAN solution that allows small businesses to deliver an enterprise-class Wi-Fi user experience in a cost effective, easy to implement, intuitive and yet feature-rich platform.

An Unleashed network can scale up to 128 Access Points and 2,048 concurrent clients in bridge mode (gateway mode supports up to 25 APs and 512 clients).

For more information on Unleashed configuration, administration, and maintenance, please see the Unleashed Online Help, available at <https://docs.commscope.com/bundle/unleashed-200.12-onlinehelp/>.

- APs R710 and R610 reboot due to kernel panic. [ER-10607]
- T610/T710 APs - Air Time Fairness (ATF) with 8x8 11ax clients; 2 clients receiving nearly zero throughput. [ER-10530]
- R320 AP VoIP silence, wrong sequence number. [ER-10181]
- R710 AP reboots due to kernel panic. [ER-10918]
- AP R750 UE with high idle time are not getting cleared from the host table. [ER-10844]
- All the clients randomly lost network connection on the AP. [ER-10797]
- R850 AP reboots due to kernel panic. [ER-10944]
- Random EAP disconnects on Zebra Scan Guns. [ER-10760]

Resolved Issues in Build 200.12.10.5.234

- SSH traffic was blocked with "untag vlan 1" in trunk uplink. [ER-10284]
- Non-existing ghost MAC was sent from AP to RTLS server. [ER-10241]
- "get mcast-airtime" returned the value "0". [ER-10202]
- Multicast (mDNS) traffic from the client not egressing out of the AP when "unicast+multicast" client isolation is enabled. [ER-10103]
- Reached buffer limit in syslog or support log. [ER-10057]
