

# Unleashed Multi-Site Manager

## What's New in Release 2.6

This application note describes the new features available in version 2.6 of RUCKUS Unleashed Multi-Site Manager (UMM). This document assumes familiarity with the RUCKUS product line and the features of earlier UMM releases.

### 1. Tunnel Connection

You can now connect to Unleashed devices CLI from the web interface through tunnel connection.

### 2. SMS Notifications

In UMM2.6, the Alarms Settings page now allows you to configure SMS notification for alarms.

### 3. ReadOnly User Capability

The ReadOnly account user can now edit the Unleashed WLAN name and password.

### 4. AP Lost Connection Alarm

The AP lost connection alarm is triggered when an AP lost heartbeat event and not recovered within the specified minutes.
